#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 7-12 and 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Ishii U.S. Patent 6,157,488.

In regard to claim 7, Ishii discloses (see Figure 12) a diffraction optical element in which a plurality of diffraction gratings are laminated, comprising: a first diffraction grating (101) which is formed on a curved surface with a material of a predetermined dispersion; and a second diffraction grating (103) which is formed on a curved surface with a material of a dispersion different from that of the first diffraction grating and adjacent to the first diffraction grating, wherein the pitches at positions of tips of corresponding grating portions of the first and second diffraction gratings are equal over the area of use as shown in Figure 12 and as described in column 15, lines 8-35.

Application/Control Number: 09/626,738

Art Unit: 2872

Regarding claim 8, Ishii discloses (see Figure 12) that the substrates on which said diffraction gratings are formed are joined together in the non-grating area (102) of each of said diffraction gratings as described in column 15, lines 8-16.

Regarding claim 9, Ishii discloses that at least one of said laminated diffraction gratings has at least one diffraction grating differing from it in the direction of the grating shape of the grating portion as shown in Figure 12.

Regarding claim 10, Ishii discloses that the wavelength area used is a visible range as described in column 13, lines 3-8.

Regarding claim 11, Ishii discloses that at least one of said plurality of diffraction gratings is such that the material forming said diffraction gratings is the same as the material forming a substrate on which said diffraction gratings are provided as described in column 13, lines 35-54.

Regarding claim 12, Ishii discloses that said substrate has lens action as described in column 13, lines 35-54.

Regarding claim 14, Ishii discloses that said plurality of diffraction gratings are laminated so that the diffraction efficiency of a particular order may heighten in the entire wavelength area used as described in column 14, lines 31-64.

Regarding claim 15, Ishii discloses an optical system using the diffraction optical element as shown in Figures 22 and 23 and as described in column 13, lines 9-30.

Regarding claim 16, Ishii discloses an imaging optical system as shown in Figures 22 and 23 and as described in column 13, lines 9-30.

Art Unit: 2872

Regarding claim 17, Ishii discloses an observation optical system as shown in Figures 22 and 23 and as described in column 13, lines 9-30.

Regarding claim 18, Ishii discloses that the first and second diffraction gratings are disposed via an air layer as described in column 11, lines 50-60.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishii in view of Ogino et al. U.S. Patent 5,995,279.

Regarding claim 13, Ishii teaches the invention as set forth above but does not teach the diffraction optical element formed on a cemented surface of a cemented lens.

Ogino et al. does teach the diffraction optical element formed on the cemented surface of a cemented lens as shown in Figures 5A-5F and as described in column 3, lines 3-33. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the diffraction grating on the cemented surface of a cemented lens as taught by Ogino et al. in the diffractive optical element of Ishii in order to create a compact diffractive optical element.

#### Response to Arguments

5. Applicant's arguments filed 14 June 2002 have been fully considered but they are not persuasive.

Application/Control Number: 09/626,738

Art Unit: 2872

Applicant argues in regard to claim 7, that Ishii shows (see Figure 12) the outermost surfaces 303 and 304 of the optical element being curved but does not show the shape of the surfaces forming the relief patterns (i.e., the gratings) as being curved. Furthermore, the Applicant argues that the surfaces on which those diffraction gratings are formed are flat because the tips of each of those diffraction gratings are aligned in a straight line rather than a curved line.

In response to this argument, the Applicant is reminded that the rejection is based upon the claim recitation. Figure 12 of Ishii clearly shows optical regions 101, 103 or surfaces, which are shaped into curves and relief patterns 201, 202 or first and second diffraction gratings which are formed on these curved surfaces (see also column 15, lines 8-13). Therefore, contrary to the applicant's assertion, the surfaces on which those diffraction gratings are not flat. Furthermore, one can see that the pitches (i.e., groove spacing) at positions of tips of corresponding grating portions of the first and second gratings are equal of the area of use as clearly shown in Figure 12.

### Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Page 6

Application/Control Number: 09/626,738

Art Unit: 2872

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Alessandro V. Amari whose telephone number is (703)

306-0533. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30

PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Cassandra Spyrou can be reached on (703) 308-1687. The fax phone

numbers for the organization where this application or proceeding is assigned are (703)

872-9318 for regular communications and (703) 872-9319 for After Final

communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0956.
